

Hereditary Breast Cancer

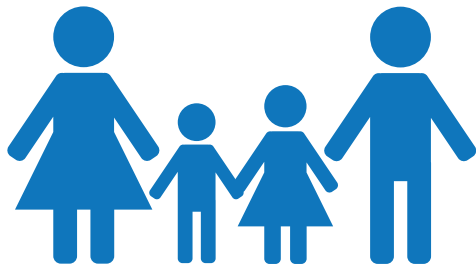

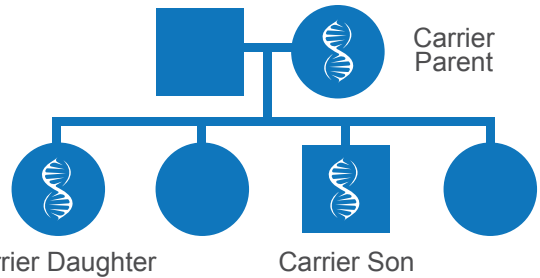

1 in 8 women will develop breast cancer in her lifetime

10% of all breast cancer is hereditary

You can inherit an *increased risk* for certain types of cancer, but you cannot inherit cancer itself.

Knowing if hereditary cancer runs in your family can be empowering information. Are you at increased risk? There may be things you can do to improve your outcome.

Want to learn more?

Talk to your provider. Ask if a hereditary cancer risk assessment is right for you.
